DANGWAURO CONTAINER TERMINAL EMBRACES DIGITAL INNOVATION WITH ARL-SHIPPING.COM'S GATE EXECUTOR PLATFORM

KANO, NIGERIA – In a landmark move that positions Kano's Dangwauro Container Terminal (DCT) at the forefront of digital logistics in Nigeria, the terminal announces the adoption of arl-shipping.com's cutting-edge Gate Executor platform. This pioneering smartphone application revolutionizes container depot management, ensuring real-time, accurate tracking and reporting of all container movements directly from the field to relevant stakeholders.

Rene Bendt, Director at arl-shipping.com, expressed excitement about the collaboration, highlighting its impact: "Our work with DCT underscores a major leap towards digitizing Northern Nigeria container operations in synergy with sea-side container movements all near-real time reflected in carrier tracking platform by EDI messages." Mark Onyemah terminal manager for Dangwauro Container Terminal, echoed this sentiment, emphasizing the strategic importance of this technology in their quest for operational excellence. "The introduction of the Gate Executor platform is a key milestone in our journey towards digital transformation and operational efficiency. We are delighted to partner with arl-shipping.com to achieve this goal," said Mark.

By ensuring a seamless flow of accurate and timely data, Dangwauro Container Terminal aims to improve decision-making, enhance customer satisfaction, and drive growth in the competitive logistics industry. This initiative positions DCT as a leader in embracing digital solutions to meet the challenges of modern logistics and container management.
